

KRISHNENDU DAS

B.Tech CSE Student (2028) | Seeking Internships | AI Automation & Prompt Engineering
Habra, North 24 Parganas, West Bengal, India | b2hkrishna@gmail.com | +91 8509569158
LinkedIn: krishnendu-das-16b772278 | GitHub: SAGETOAD-source

SUMMARY

B.Tech CSE student (expected 2028) with hands-on experience building end-to-end AI automation systems, including a fully automated content pipeline that generates and publishes short-form video using LLM scripting, TTS, and auto-upload APIs. Strong fundamentals in C/C++, Python, Java, DSA, and theory of computation, with a practical, build-first approach to learning. Seeking internship opportunities in software development and AI/automation engineering.

SKILLS

Languages: C, C++, Java, Python

Frameworks & Tools: FastAPI, Flask, Streamlit, Git, SQL

CS Fundamentals: Data Structures & Algorithms, Theory of Computation, Discrete Mathematics

AI & Automation: Prompt Engineering, LLM-based Automation Pipelines, Applied AI Concepts (search, planning, neural networks)

EDUCATION

B.Tech in Computer Science & Engineering

Adamas University, Kolkata, India | Expected Graduation: 2028 | CGPA: ~8.0 / 10

PROJECTS

Auto Shorts Bot - Automated Short-Form Video Pipeline

Python, Groq LLM (Llama 3.3 70B), edge-tts, MoviePy, Cloudinary, YouTube Data API, Instagram Graph API

- Built a system of coordinated bots that autonomously generate and publish short-form video content to YouTube Shorts and Instagram Reels across multiple content niches.
- Pipeline covers trending-topic discovery, LLM-based scripting, AI voice narration, automated video rendering, and scheduled auto-posting with no manual intervention.

AI Shorts Generator from Long-Form Video

Python, AI video/audio processing, auto-captioning, hook-scoring model

- Converts a long-form YouTube video into short-form clips by automatically adding background music and captions.
- Scores generated clips by estimated audience 'hook' potential and auto-uploads the top clips to YouTube and Instagram.

AI Meme Caption Generator

Python, FastAPI/Flask, LLM integration

- Generates meme captions from a given topic or an uploaded photo/meme image using AI-based text generation.

Project Clown - Custom Chrome New Tab Extension

JavaScript, HTML/CSS, Chrome Extension Manifest V3, Open-Meteo API

- Chrome extension that replaces the default New Tab with a personal productivity dashboard featuring a live clock, weather, focus timer, quick notes, and organized bookmarks.
- Includes a customizable wallpaper picker, quick-launch shortcuts, and daily quote/tech-byte widgets, with all data persisted locally.

Aura Music - Android Music Streaming & Recording App

TypeScript, HTML5 Audio, Capacitor, PWA

LinkedIn: krishnendu-das-16b772278 | GitHub: SAGETOAD-source

- Android-focused music streaming and offline-playback app with equalizer support, built as a PWA/native app via Capacitor.
- Includes voice/audio recording with autotune, alongside local media scanning, gesture-based controls, and hardware-synchronized background playback.
